

Name: _____

Date: _____

Adding Fractions

Same Denominator

When fractions have the same denominator, add the numerators.
Keep the denominator the same.

Example: $\frac{2}{8} + \frac{3}{8} = \frac{5}{8}$

Directions: Add the fractions. Write your answers in simplest form.

1. $\frac{1}{7} + \frac{2}{7} =$

2. $\frac{3}{9} + \frac{4}{9} =$

3. $\frac{2}{5} + \frac{1}{5} =$

4. $\frac{4}{6} + \frac{1}{6} =$

5. $\frac{3}{8} + \frac{2}{8} =$

6. $\frac{5}{10} + \frac{3}{10} =$

7. $\frac{2}{3} + \frac{1}{3} =$

8. $\frac{4}{12} + \frac{5}{12} =$

9. $\frac{1}{4} + \frac{2}{4} =$

10. $\frac{3}{11} + \frac{6}{11} =$

Great job! Keep up the amazing work! ☆
