

Name: _____

Date: _____

DIVISION CONCEPT INTRODUCTION

Division means sharing equally!

When we divide, we share items into equal groups.

We can write a division sentence to show it.

Example:

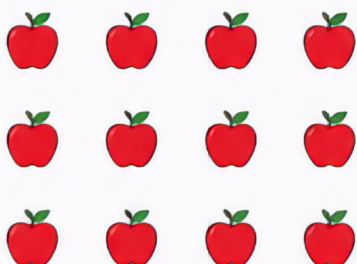

Share 8 cookies equally into 2 groups.

$$8 \div 2 = 4$$

Each group gets 4 cookies.

Directions: Look at each picture. Share the items equally into the number of groups.
Write a division sentence and how many are in each group.

1. Share 12 apples equally into 3 groups.

Draw your groups:

Division sentence:

_____ ÷ _____ = _____

Each group gets:

_____ apples.

2. Share 15 stars equally into 5 groups.

Draw your groups:

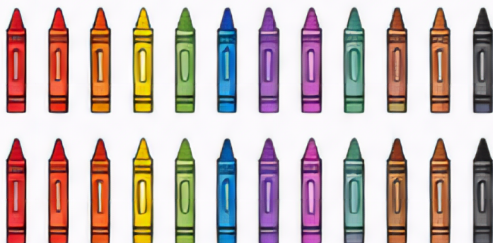

Division sentence:

_____ ÷ _____ = _____

Each group gets:

_____ stars.

3. Share 18 crayons equally into 6 groups.

Draw your groups:

Division sentence:

_____ ÷ _____ = _____

Each group gets:

_____ crayons.

Think It! If you have 20 candies and share them equally into 4 groups, how many in each group?
