

Name: _____

Date: _____

Division with Remainders

When we divide and have something left over, that leftover amount is called the **remainder**.

Example: $17 \div 3 = 5 \text{ R } 2$

 ↑ ↑

 Quotient Remainder

17 shared equally among 3 is 5, with 2 left over.

Directions: Solve each problem. Write your answer in the form of **Quotient R Remainder**.

1. $23 \div 4 =$ _____ 2. $17 \div 5 =$ _____ 3. $29 \div 6 =$ _____

4. $31 \div 7 =$ _____ 5. $14 \div 3 =$ _____ 6. $38 \div 8 =$ _____

7. $26 \div 5 =$ _____ 8. $19 \div 4 =$ _____ 9. $22 \div 6 =$ _____

10. $41 \div 9 =$ _____ 11. $34 \div 7 =$ _____ 12. $27 \div 4 =$ _____
