

Name: _____

Date: _____

Fractions Equal to One Whole

Directions: Write an equivalent fraction that is equal to one whole.
The first one is done for you.

Example:

1. $\frac{4}{4} = \underline{1}$

When the numerator and denominator are the same, the fraction is equal to one whole.

Write an equivalent fraction that is equal to one whole.

2. $\frac{2}{2} = \underline{\hspace{2cm}}$

3. $\frac{3}{3} = \underline{\hspace{2cm}}$

4. $\frac{5}{5} = \underline{\hspace{2cm}}$

5. $\frac{6}{6} = \underline{\hspace{2cm}}$

6. $\frac{7}{7} = \underline{\hspace{2cm}}$

7. $\frac{8}{8} = \underline{\hspace{2cm}}$

8. $\frac{9}{9} = \underline{\hspace{2cm}}$

9. $\frac{10}{10} = \underline{\hspace{2cm}}$

10. $\frac{12}{12} = \underline{\hspace{2cm}}$

11. $\frac{15}{15} = \underline{\hspace{2cm}}$
