3rd Grade Math

Identifying Place Value of Digits

In a three-digit number:

- The **hundreds** place is the left digit.
- The **tens** place is the middle digit.
- The **ones** place is the right digit.

Hundreds	Tens	Ones
3	4	7
300	40	7

Directions: Look at each number below. Identify the place value of the underlined digit. Write **hundreds**, **tens**, or **ones** on the first line. Then, write the value of the digit on the second line.

1. 4 2 7
